ET A Challenge in the sum of \$1,000.—OPEN FOR ORE WEEK.—To all Sate Makers in the United States who do not make or infringe upon Widders' Patent, a right which I have enjoyed, and transhed to the public, with all the improvements since it was first patented. The result of everal former trais when fairly tested with where Safes and the numerous accidental fires which has brought then in contact with other Safes, has desorved by the fir alreadof all similar protectors. In order that the public may have a forther opportunity of judging whether tien verded as rendered in favor of my Safe has been a correct ose, I propose another fair and impartial trad upon the following conditions.

First: A Committee of respectable citizens to be selected (as may hereafte be agreed upon) to conduct the trial. Scood: Each party accepting and entering upon terms in writing to furials said. Committee with a given number of names of partes who have purchased their Safes, and new have them it use.

That a The Committee to select one of each makers, of cerresponding size so that the maker cannot be allowed to manufacture one oppessity for a furnace of labor the first as such suspicion having always attached itself to all premeditated tests of airs. The public are not interested in knowing who can make a Safe to stand a blast formace of a blow pipe heat the longest. But it is of vast importance to the whole commercial world to know who furnishes them with a Safe which proves the best in a natural, accidental fire, such as one would be subjected to in the burning of a store, house, fetory, or other building.

Fearth: The Committee to conduct the fire, and render aspert in writing, for polication.—N. York, Nov 10, 1851, all MToTaksat.
